

WHAT YOU DO HERE

INTERNSHIPS THAT LEAD SOMEWHERE

You have the opportunity to work a paid internship at a local firm or a national one. For some, internships become full-time jobs. Recent placements include AMD, Amazon Web Services, General Motors, Corewell Health, Navy Federal Credit Union, Meta, Vervint, Bindplane, EduStaff, Sonset Solutions, Wycliffe Bible Translators, and the Christian Classics Ethereal Library.

UNDERGRADUATE RESEARCH OPPORTUNITIES

You can join a professor's research as an undergraduate student. Current research spans language models and everyday creativity, internet infrastructure and security, agent-based models of how misinformation and health behaviour spread, education tools, high performance computing, Artificial Intelligence, and embedded systems.

LIBERAL ARTS AND THE CALVIN CORE

Employers want people who can assess a problem, think it through, communicate it in writing, and work well with colleagues, clients, and the people they report to. That is what the Calvin Core builds, and it is woven throughout your undergraduate experience.

WHERE OUR GRADUATES GO

Calvin CS alumni are currently at Google, Amazon, Meta, Steelcase, Corewell Health, Bank of America, the Washington Post, Amway and Pray.com. Others have gone on to graduate school at Johns Hopkins, MSU, Michigan Tech, Purdue, the University of Waterloo, and the University of Sydney, and some now teach at Grand Valley State University and George Mason University. Some have stayed to work at Calvin after graduating, joining the Christian Classics Ethereal Library and hymnary.org.
