

WHAT YOU DO HERE

INTERNSHIPS THAT LEAD SOMEWHERE

Students work a paid internship at a local firm or a national one, and many turn into offers. Recent placements include AMD, Amazon Web Services, General Motors, Corewell Health, Navy Federal Credit Union, Meta, Vervint, Bindplane, EduStaff, Sonset Solutions, Wycliffe Bible Translators and the Christian Classics Ethereal Library.

UNDERGRADUATE RESEARCH

You can join a professor's research rather than wait for graduate school. Current work spans language models and everyday creativity, internet infrastructure and denial-of-service defence, agent-based models of how misinformation and health behaviour spread, computer science education, and embedded systems and robotics.

LIBERAL ARTS AND THE CALVIN CORE

The Core sits alongside the major rather than under it. Graduates leave able to write, argue and place their work in a longer history, which is the difference employers describe when they say someone is easy to work with.

WHERE OUR GRADUATES GO

Alumni are at Google, Amazon, Meta, Steelcase, Corewell Health, Bank of America, the Washington Post, Amway and Pray.com, and in graduate programmes across the country. *[Confirm the graduate school list before print. The version on the website is of unknown vintage.]*
