

# WHAT YOU DO HERE

## INTERNSHIPS THAT LEAD SOMEWHERE

Students work a paid internship at a local firm or a national one. Many internships become offers. Recent placements include AMD, Amazon Web Services, General Motors, Corewell Health, Navy Federal Credit Union, Meta, Vervint, Bindplane, EduStaff, Sonset Solutions, Wycliffe Bible Translators and the Christian Classics Ethereal Library.

## UNDERGRADUATE RESEARCH OPPORTUNITIES

You can join a professor's research rather than wait for graduate school. Current work spans language models and everyday creativity, internet infrastructure and security, agent-based models of how misinformation and health behaviour spread, education tools, high performance computing, artificial intelligence, and embedded systems and robotics.

## LIBERAL ARTS AND THE CALVIN CORE

Technical skill is the entry ticket, not the job. Employers want people who can size up a problem, think it through, explain it in writing, and work well with colleagues, clients and the people they report to. That is what the Core builds, and it runs through all four years rather than sitting underneath the major.

## WHERE OUR GRADUATES GO

Alumni are at Google, Amazon, Meta, Steelcase, Corewell Health, Bank of America, the Washington Post, Amway and Pray.com. Others went on to graduate school at Johns Hopkins, MSU, Michigan Tech, Purdue and the University of Sydney, and some now teach, at Grand Valley State University, George Mason University and the Christian Classics Ethereal Library.
