

# COMPUTER SCIENCE DEPARTMENT

## CHRIST-CENTERED UNDERSTANDING

Technology is never neutral, and we take it seriously. You will study the ethics and philosophy of technology as well as the engineering of it, and ask what a piece of software does to the people who use it. Faith integration with computing is our passion, not an add-on module.

## PROFESSORS WITH OPEN DOORS

Every course in the major is taught by a professor, and their offices sit along one corridor in North Hall. You will not be handed off. Their doctorates come from Harvard, Purdue, McMaster, Waterloo, Rensselaer, Amsterdam and São Paulo, and several worked in industry first.

## FOUR-YEAR PATH TO GRADUATION

The Bachelor of Computer Science is 124 credit hours when paired with the Calvin Core, so you graduate having read and argued as well as built. The degree is ABET accredited, the standard employers and graduate schools look for.

## ACADEMIC OPTIONS

### DEGREES

**Bachelor of Computer Science (BCS)**

Our most rigorous programme. ABET accredited.

**BS in Computer Science Plus**

Computer science with an applied field of your choice.

**BS in Data Science**

Computer science and statistics, paired with a subject area.

### MINORS

Data Science

Data Analytics

### CERTIFICATE

**Cybersecurity**

Six courses, 18 credit hours, taken with any of the degrees.

### PAIR WITH

Biology · Business · Economics · Geography · Political science · Psychology · Languages
