

COMPUTER SCIENCE DEPARTMENT

CHRIST-CENTERED UNDERSTANDING

Technology is never neutral, and we take it seriously. You will study the ethics and philosophy of technology as well as the engineering of it, and ask what a piece of software does to the people who use it. Faith integration with computing is our passion, not an add-on module.

PROFESSORS WITH OPEN DOORS

Every course in the major is taught by a professor, and their offices sit along one corridor in North Hall. Their doctorates come from Harvard, Purdue, McMaster, Rensselaer, Amsterdam and São Paulo, and several worked in industry first.

FOUR-YEAR PATH TO GRADUATION

The Bachelor of Computer Science is 124 credit hours when paired with the Calvin Core, so you graduate with a breadth of knowledge as well as depth in your field. The degree is ABET accredited, the standard employers and graduate schools look for.

ACADEMIC OPTIONS

DEGREES

Bachelor of Computer Science (BCS)

Our most rigorous programme. ABET accredited.

BS in Computer Science Plus

Computer science with an applied field of your choice.

BS in Data Science

Computer science and statistics, paired with a subject area.

MINORS

Data Science

Data Analytics

CERTIFICATE

Cybersecurity

Six courses, 18 credit hours, taken with any of the degrees.
