

# Computer Science Plus

The same computer science degree, with twelve hours in an applied field of your own choosing.

## FRESHMAN

| FALL | 14 hrs                                                                         |
|------|--------------------------------------------------------------------------------|
| 4    | CS 108 Introduction to Computing F,S                                           |
| 4    | MATH 161 Calculus: Modeling and Computation F,S                                |
| 0    | CS 195 Introductory Computing Seminar F,S                                      |
| 2    | CORE 100 Community and Commitments                                             |
| 4    | World Languages 1 Waived with two years of high school language at B or better |

| SPRING | 15 hrs                                     |
|--------|--------------------------------------------|
| 4      | CS 112 Introduction to Data Structures F,S |
| 2      | MATH 251 Discrete Mathematics I S          |
| 0      | CS 195 Introductory Computing Seminar F,S  |
| 4      | ENGL 101 Foundational Writing              |
| 4      | World Languages 2                          |
| 1      | Health and Movement 1                      |

## SOPHOMORE

| FALL | 16 hrs                                      |
|------|---------------------------------------------|
| 4    | CS 212 Data Structures and Algorithms F     |
| 4    | DATA 202 Introduction to Machine Learning F |
| 4    | Your applied field Twelve hours in total    |
| 0    | CS 195 Introductory Computing Seminar F,S   |
| 4    | Christian Foundations 1                     |

| SPRING | 16 hrs                                               |
|--------|------------------------------------------------------|
| 4      | CS 214 Programming Language Concepts S               |
| 2      | MATH 252 Discrete Mathematics II S<br>needs MATH 251 |
| 4      | STAT 243 Statistics S                                |
| 4      | Core course Arts and Rhetoric                        |
| 2      | Christian Foundations 2                              |

## JUNIOR

| FALL | 16 hrs                                                 |
|------|--------------------------------------------------------|
| 4    | CS 262 Software Engineering F<br>needs junior standing |
| 4    | ENGR 220 Introduction to Computer Architecture F       |
| 4    | Your applied field                                     |
| 0    | CS 295 Computing Seminar F,S                           |
| 4    | Core course Knowledge and Understanding                |

| SPRING | 15 hrs                                    |
|--------|-------------------------------------------|
| 4      | CS 232 Operating Systems and Networking S |
| 4      | CS elective Six hours in total            |
| 0      | CS 295 Computing Seminar F,S              |
| 1      | Health and Movement 2                     |
| 4      | Core course Knowledge and Understanding   |
| 2      | Elective                                  |

## SENIOR

| FALL | 16 hrs                                       |
|------|----------------------------------------------|
| 2    | CS 396 Senior Project, or CS 383 Practicum F |
| 0    | CS 295 Computing Seminar F,S                 |
| 4    | Your applied field                           |
| 4    | Core course Knowledge and Understanding      |
| 4    | Elective                                     |
| 2    | Elective                                     |

| SPRING | 16 hrs                                  |
|--------|-----------------------------------------|
| 2      | CS 398 Senior Project in Computing II S |
| 4      | CS 384 Perspectives on Computing S      |
| 2      | CS elective                             |
| 4      | Elective                                |
| 4      | Elective                                |

F offered in the autumn S offered in the spring · a full-time semester is about 16 hours  
This is one way through the degree. Your adviser will build yours with you.

TO GRADUATE  
**124 hours**
